CONTENTS FOR

FLUID MECHANICS-Soviet Research

Volume 12, Nos. 1-6, 1983

NUMBER 1

1 Aerodynamics of a Circular Cylinder in Crossflow
N.M. Bychkov and V.M. Kovalenko

17 Aerodynamic Forces on a Smooth Rotating Cylinder in Crossflow
N.M. Bychkov and V.M. Kovalenko

33 Generation of Hydroelastic Fluctuations in Two-Phase Flow in Tube Bundles
N.S. Leleyev and G.Ye. Tereshina

41 Hydraulic Drag of Helically Twisted Tubes at High Reynolds Numbers
P.A. Savel'yev and Yu.S. Voskresenskiy

47 Aerodynamic Forces on a Rotating Rough Cylinder in Crossflow
N.M. Bychkov and V.M. Kovalenko

58 Discharge Coefficients of Axisymmetric Supersonic Laval Nozzles and the Effect of Inlet Conditions on These Coefficients
V.N. Lebedev and P.V. Nikitin

65 Pressure Drops in Dispersed-Annular Flows
M.A. Gotovskiy, P.L. Magidey, N.D. Agafonova and B.M. Lekakh

71 The Holdup of Liquid in Erosion Cavities of Rotor Blades of Wet-Steam Turbine Stages
I.P. Faddeyev, Al.I. Maslyanko, An.I. Maslyanko and S.L. Khaviya

75 The Effect of Pressure on the Dynamics of Evaporation of a Fuel Droplet
O.N. Lebedev and V.N. Marchenko

81 Investigation of the Mean Voids Fraction of the Dynamic Two-Phase Layer in Closed Thermosiphons
M.K. Bezrodnyy, A.N. Alabovskiy and V.F. Moklyak

87 Experimental Study of the Turbulent Boundary Layer of a Jet with Condensation
A.K. Karyshev

92 Determination of the Departure Dimensions of Bubbles in Liquids Boiling on Heated Surfaces
L.F. Fedorov and S.T. Mosin

100 Suppression of Entrainment of Liquid from a Bubbling Bed with a Vane Separator
L.S. Sterman and A.A. Solov'yev
106 Analytic Study of Transcritical Discharge of Gas-Liquid Mixtures with Bubbly Structure
V.V. Nevinskiy, V.I. Rozenblyum and M.I. Savel'yev
112 Experimental Study of the Gas Content of the Bubbling Zone in a Submerged-Burner Unit with a Circulator Tube
A.N. Alabovskiy, A.A. Pochechun and V.P. Salo
116 Investigation of the Range of Liquid-Fuel Spray in a Jet-Type Burner
Yu.F. Tkachuk, G.N. Lyubchik, G.G. Leont'yev and M.A. Rybak
122 Phase Relationships in Pulsed Combustion
V.S. Severyanin
126 Investigation of the Structure of Gas-Liquid Flow in a Slotted Disks Centrifuge Extractor
M.M. Khodyker
131 Generation of Internal Gravity Waves in a Thermocline
I.V. Sturova and V.A. Sukharev

NUMBER 2

1 Certain Phenomena and Paradoxes in Aerodynamics and Hydraulics
I.Ye. Idel'chik
97 Investigation of the Dynamics of a Two-Dimensional Gas-Filled Cavity near the Free Surface of a Ponderable Liquid
V.V. Voronin
110 Investigation of Transition from Laminar to Turbulent Boundary Layer Flow by Means of a Thermal Imaging System
M.A. Golovkin, V.P. Gorban', V.B. Dorokhov, V.M. Lutovinov, V.S. Ponomareva, A.A. Poskachey, V.I. Sukharev, V.V. Troitskiy, and S.M. Shestayev
121 Turbulent Fluctuations of Shear Stress at the Wall
B.M. Yefimtsov, V.B. Kuznetsov and V.A. Sysoyev
132 Conductometer Method of Monitoring the Wall on Which Gas Bubbles are Generated on a Single Site in Boiling and Bubbling
I.M. Fedotkin, A.V. Gukalov, and V.A. Kravchenko

NUMBER 3

1 Specifics of Experimental Study of Flow of Two-Phase Systems Encountered in Chemical Engineering
8 Optical Methods for Investigating Two-Phase Flow
74 Techniques for Investigating Two-Phase Flow by Means of Radioactive Sources
86 X-Ray Techniques for Investigating Two-Phase Flow
99 The Use of Probes in Investigating Two-Phase Flow
I.O. Protodyakonov and V.A. Glinskiy

NUMBER 4

1 Methods and Apparatus for Measuring the Basic Characteristics of Pipeline Transport of Containers
V.V. Fadeichev and A.I. Yagodzinskiy

5 Filtration Through Nonwoven Polymer Fabric
V.L. Fridrikhson

11 Effect of the Two-Phase Nature of the Flow on the Operation of Pumping Apparatus
A.N. Ivanov, S.B. Osipenko and N.A. Prikhod'ko

15 Nonlinear-Dispersion Effects in the Travel of Surface Waves over Irregularities of the Bottom Topography
R.I. Demchenko and M.I. Zheleznyak

23 Solitary Internal Waves in a Two-Layer Liquid with a Free Surface
I.V. Gavrilov

28 Dynamic Interaction of Liquid-Filled Reservoirs with an Elastic Half-Space
A.N. Trofimchuk

34 Propagation of Heat Waves in Parametric Media
O.N. Shablovskiy

37 Method for Measuring the Integral Characteristics of a Boundary Layer
V.I. Korobov and B.B. Babenko

45 Methods for Calculating the Size Distribution of Droplets in Two-Phase Flow with Allowance for Their Breakup
Yu.I. Daskal

52 Effect of the Real Properties of the Carrier Vapor on the Droplet Vaporization Time
G.A. Karpova and A.L. Stasenko

59 Calculation of the Velocity Field in the Effective Range of an Air-Water Curtain
I.V. Pyatetskiy

66 Finite-Amplitude Waves in Stratified Vapor-Liquid Flow
S.I. Lezhnin

73 Transient Heat Transfer to a Particle Moving at Variable Velocity in an Ideal Fluid
Yu.P. Gupalo, A.D. Polyanin, P.A. Pryadkin and Yu.S. Ryazantsev

78 Loss of Separation of Aerosol-Size Particles in a Cyclone Chamber
V.I. Bagryantsev and V.I. Kislykh

87 Estimate of the Effectiveness of Methods for Reducing Jet Noise
V.M. Kuznetsov and A.G. Munin

96 Hydrodynamic-Type Equations and Problems of Transitivity of Simple Climate Models
S.Ye. Lyapin

117 A Hydrodynamic-Type System
Kh.L. Smolitskiy and S.Ye. Lyapin

130 Generation of Vortex Rings
V.A. Vladimirov and V.F. Tarasov

NUMBER 5

1 Experimental Study of Drag Reduction by Means of Injection of a Wall Jet
V.V. Babenko, L.F. Kozlov, V.P. Ivanov and V.I. Korobov

12 Approximate Determination of the Critical Mach Number from the Analytically Determined Pressure Distribution
V.A. Barinov

20 Interaction between the Boundary Layer and the Free Stream in Flow Over Slender Axisymmetric Bodies
V.N. Trigub

31 Use of Freon-14 as a Working Fluid in Wind Tunnels for Simulation of Hypersonic Air Flows
V.N. Komarov, O.Yu. Polanskiy and A.V. Chirikhin

42 Flow-Plane Interaction of Wall Jets with a Free Stream and with One Another
N.A. Kolokol'tsev

54 Effect of Processes in the Planetary Boundary Layer on the Shaping of the Climate
V.P. Meleshko, B.E. Shneyerov, A.S. Dubov and L.N. Magazenkov

86 Excitation of Internal Waves during the Collapse of a Mixing Region
V.I. Nikishov

95 Method for Calculating the Characteristics of Fluid-Mechanical Systems with Allowance for Wave Processes
V.M. Roman

103 Design of Panel-Type Wavemakers
V.P. Mal'tsev

111 Hydrodynamic Excitation of Waves by the Surface of a Burning Viscous Liquid
S.K. Aslanov

123 Generalized Semiempirical Equation for Turbulent Diffusion
S.I. Kril'

126 Integral Method for Evaluating the Behavior in the Main Zone of a Low-Swirl Turbulent Jet
A.I. Szigety

136 Development of Secondary Currents in a Bounded Rectangular Jet
Yu.A. Aleksandrov

NUMBER 6

1 Numerical Analysis of Nonequilibrium Two-Phase Flow in a Mixing Gasdynamic Laser
S.N. Veselov and Yu.Ye. Markachev

11 Investigation of Maxima of Instantaneous Velocity Fluctuations in Turbulent Flows
A.A. Praskovskiy

17 Effect of Chemical Reactions on the Flow of Air in a Viscous Shock Layer
V.P. Provotvorov and V.V. Ryabov

26 Parametric Analysis of the Acoustic Power Emitted by Coaxial Jets
V.F. Samokhin
37 Experimental Determination of the Profile Drag by the Momentum Method
V.K. Kuznetsov, N.P. Mikhaylov and Ye.U. Repik
44 A Numerical and Experimental Study of the Feasibility of Extending the Useful Running Time of a Ludwieg Tube
A.M. Naumov
52 Dynamics of a System of Objects in an Ideal Liquid
V.A. Gorban'
60 Two Ways to Apply the Methods of the Theory of p-Analytic Functions to Axisymmetric Problems of Fluid Mechanics
V.V. Popov
69 Dynamics of the Planetary Boundary Layer of the Atmosphere
M.E. Shvets and B.E. Shneyerov
89 Sensitivity of the Calculated Climatic Regime in the Atmosphere to Changes in Certain Parameters of the Boundary Layer
V.P. Meleshko, B.E. Shneyerov and G.V. Parshina
99 Adiabatic Version of a Baroclinic Spectral Model of the Atmosphere
A.P. Sokolov and D.A. Sheynin
110 Approximation of the Complete Hydrodynamic Equations of the Atmosphere via Layer-by-Layer Averaging
L.N. Magazenkov
116 Equations of the Hydrodynamic Type Generated from the Advection Equation by Correction for Viscosity
S.E. Lyapin
123 Comparison of the Results of a Generalization of Experimental Data with Calculations from a Three-Parameter Model of the Atmospheric Boundary Layer
S.N. Stepanenko and V.A. Shnaydman
132 An Algorithm for Statistical Modeling of Series of Meteorological Observations
R.L. Kagan and E.E. Sibir
